

Jayden's kite tail had 17 bows. Some of the bows fell off in the wind. Now there are 6 bows left. How many bows fell off?

UNDERSTAND

Read the problem, gather important information, and write what the question is asking you to find.

PLAN

Choose a strategy and draw out your plan of action.

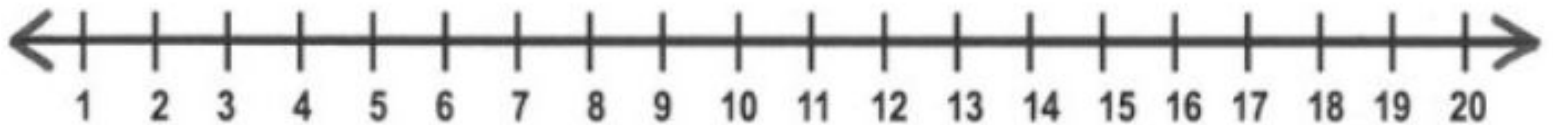

SOLVE

Use your plan to choose an operation and solve.

CHECK

Check your work using inverse operation. Did you answer the question and is your solution reasonable?

Ella ate 4 strawberries. Mila ate 9 strawberries. How many more strawberries did Mila eat than Ella?

UNDERSTAND

Read the problem, gather important information, and write what the question is asking you to find.

PLAN

Choose a strategy and draw out your plan of action.

SOLVE

Use your plan to choose an operation and solve.

CHECK
